Professional Summary

Full-stack software engineer with four years of experience building web applications using Python, Django, Django REST Framework, React, TypeScript, and PostgreSQL. Passionate about backend engineering, API design, scalable software architecture, payment integrations, and developer tooling. I also code high-converting user interfaces. Experienced in taking products from concept to deployment while publishing technical content for the developer community.

Skills

Languages: Python, TypeScript, JavaScript, SQL

Backend: Django, Django REST Framework, REST APIs, Authentication, Webhooks, Rate Limiting, Payment Integration

Frontend: React, Tailwind CSS, shadcn/ui, Chart.js

Databases: PostgreSQL, MySQL

Tools: Git, GitHub, Vercel, Render, Cloudinary, Ppxl

Concepts: OOP, Algorithms, Concurrency, Software Design

Experience

Independent Full-Stack Software Engineer (2022–Present)

Design and build full-stack applications, architect REST APIs, integrate third-party services including Paystack, deploy applications, and continuously study scalable backend systems and software engineering best practices.

Selected Projects

Square

Freelance marketplace for Nigerian artisans built with React, TypeScript, Django, DRF and PostgreSQL.

Akant

Expense-splitting SaaS with debt simplification, bank transfers and reminders.

Lemur

Reddit-style discussion platform focused on performance and scalability.

Paystack for Django

Comprehensive implementation guide for Paystack with Django & DRF covering transactions, subscriptions and secure webhooks.

Technical Writing

Published technical articles on dev.to covering Django, Django REST Framework, backend development and software engineering. Authored the Paystack for Django guide.
