

Summary

Full-stack developer with 3–4 years of experience building high-quality, production-ready web applications that help businesses attract, engage, and convert more prospects. Experienced in developing everything from clean, responsive frontend interfaces to secure and complex e-commerce platforms, with a strong focus on writing maintainable, well-structured code. I enjoy turning complex problems into elegant, functional digital solutions that are both scalable and easy to use. Comfortable working across the full stack, from database design to polished UI, and collaborating closely with designers and stakeholders to ship reliable products. Currently expanding my expertise in mobile application development to broaden the range of platforms I can build for.

Experience

Full-Stack Software Development at Deus Studio

2026 – Present

- Designed and developed full-stack web applications for clients using React, Django, and PostgreSQL, delivering scalable solutions tailored to business requirements.
- Collaborated with designers and stakeholders to implement responsive user interfaces, secure APIs, and optimized application performance across multiple client projects.

Freelance Software Developer

2023 – Present

- Built custom web applications for businesses and individuals, transforming requirements into production-ready products with modern frontend and backend technologies.
- Developed REST APIs, authentication systems, payment integrations, and admin dashboards while ensuring maintainable code, security, and performance best practices.

Web Developer for Tabbiebakes

2025 – Present

- Designed and developed a modern, responsive website that showcases products, strengthens the brand's online presence, and improves customer engagement.
- Optimized website performance, mobile responsiveness, and user experience while implementing reusable components and maintainable frontend architecture.

Capabilities
